VDA 6.5 - Product Auditor - Qualification

1. Contents:

Do the products offer the quality expected by customers? That is the central question in all product audits. In the automotive industry, they have been an indispensable tool for evaluating and improving product quality for many years. The standard VDA 6.5 is a guide for the creation of audit programs and audit plans as well as for audit execution, reporting and measures management.

In this one-day training, you will learn how to create efficient audit programs, develop targeted audit plans, conduct product audits, and evaluate product quality with an appropriate defect classification. The documented results of an audit form the basis for the continuous improvement of product quality.

2. Objectives:

- a) You will be familiar with the structure of audit programs and be able to create them in a technically correct manner.
- b) You will be able to develop the necessary audit plans in a targeted manner.
- c) You will be able to carry out product audits professionally.
- d) You will evaluate the product quality with an appropriate defect classification.
- e) You will be able to document the results of an audit appropriately.

3. Concept and Methods:

The training includes short technical presentations, group exercises and plenary discussion of the results. The creation of an audit program and an audit plan is practiced using a concrete, practical example.

4. Target Audience:

Personnel who plan or conduct product audits in companies.

5. Prerequisites for Attendance:

None.

6. Certificate of Qualification:

After passing the knowledge test (Multiple-Choice-Test), you will receive a digital certificate of qualification.

7. Duration:

1 day (8 hours).

8. Accompanying Material:

VDA Volume 6.5 (included in the fee for face-to-face training).
